

## Public Notice

The City of Prineville Public Works Department will begin their annual weed control program beginning April 15, 2019. The spraying program will continue through the month of May depending on weather conditions. This program is administered by a contracted licensed spray service to achieve the safest long term results. The spraying program consists of road shoulders, fire hydrants, City owned properties and alley ways. After application there may be some slight odor depending on environmental factors, this should not be a cause for alarm as it poses no health danger and will dissipate. The Public Works Department asks that property owners make sure that their alley ways are clear of personal property and that their fences are in an upright secure fashion. The Public Works Department appreciates the public's cooperation during this program. If you desire to not have your alley frontage sprayed, please feel free to contact Scott Smith @ 541-419-3165
